List of Figures.....	XI
List of Tables.....	XV
List of Acronym.....	XVII
ABSTRACT	XVIII
Chapter 1	
Introduction to Plant Disease Detection System.....	1
1.1 Introduction.....	1
1.1.1. Application areas of Agricultural Image Processing	1
1.2 Crop/Plant Disease Detection	2
1.2.1 Legume Leaf Diseases.....	3
1.3 Introduction to Image processing	4
1.3.1 Digital Images and Image processing techniques.....	5
1.3.2 Application Area of Image Processing	6
1.4 Plant Disease Detection using Image Processing	6
1.4.1 Image Acquisition	8
1.4.2 Image Pre-processing	9
1.4.3 Image Segmentation.....	9
1.4.4 Feature Extraction	9
1.4.5 Classification.....	10
1.5 Challenges and Issues.....	10
1.6 Statement of the problem.....	11
1.7 Need of the proposed research.....	11
1.8 Objective of the study	12
1.9 Advantage of the study	13
1.10 Disease of Mung bean plant leaf.....	13

1.10.1 Mung bean Yellow Mosaic Virus (MYMV).....	13
1.10.2 Cercospora Leaf Spot (CLS)	14
1.10.3 Powdery Mildew	15
1.10.4 Healthy	17
1.11 Experimental Images.....	17
1.12 Outcome of study.....	20
1.13 Scope of the Study	20
1.14 Limitations of the Study	21
1.15 Organization of the Thesis	21
References.....	23
Chapter 25	
Literature Review	25
2.1 Introduction	25
2.2 Literature Review based on SVM	26
2.3 Literature Review based on ANN/CNN	28
2.4 Literature Review based on PCA/ K-means clustering and Neural Networks	31
2.5 Literature Review based on Common classifiers	32
2.6 Conclusion.....	38
References.....	40
Chapter 3	
Plant Foliar Disease Identification Model (PFDIM)	50
3.1 Introduction	50
3.1.1. Selection of crop	50
3.1.2. Plant Organ.....	51
3.2 PLANT FOLIAR DISEASES IDENTIFICATION MODEL - (PFDIM)	51
3.3 Hypothesis.....	60
References.....	61
Chapter 4	
Development of Plant Foliar Disease Identification Model (PFDIM)	62
4.1 Introduction	62
4.2 Mung Leaf Data Collection.....	63
4.3 Designing and Developing Mung Leaf disease Recognition Interface	65
4.3.1 Features of Leaf Disease Classification Interface	65
4.4 Developing Leaf Diseases Recognition System Engine	69
4.4.1 Pre-processing.....	69

4.4.1.1 Resizing an image	70
4.4.1.2 Augmentation.....	73
4.4.1.3 Edge Detection	78
4.4.2 Feature Extraction and Segmentation.....	79
4.4.2.1 HSV color map method.....	79
4.4.2.2 grabCut() color map method.....	82
4.4.2.3 Applying HOG	85
4.4.2.3.1 RGB to Grayscale conversion.....	85
4.4.3 Training Process.....	89
4.5 Training Process of Classifiers	90
4.5.1 Classification in Machine Learning	90
4.5.2 Support Vector Machines (SVM)	91
4.5.2.1 Training process for SVM.....	92
4.5.2.1.1 Training process for SVM in controlled environment	92
4.5.2.1.2 Training process for SVM in uncontrolled environment	94
4.5.2.1.3 Training process for SVM in combined environment.....	97
4.5.3 K-Nearest Neighbor (KNN).....	99
4.5.3.1 Training process for KNN	100
4.5.3.1.1 Training process for KNN in controlled environment.....	100
4.5.3.1.2 Training process for KNN in uncontrolled environment	102
4.5.3.1.3 Training process for KNN in combined environment	103
4.5.4 Adaptive Boosting (AdaBoost).....	104
4.5.3.3 Training process for AdaBoost.....	105
4.5.3.3.1 Training process for AdaBoost in controlled environment	105
4.5.3.3.2 Training process for AdaBoost in uncontrolled environment	106
4.5.3.3.3 Training process for AdaBoost in combined environment.....	108
4.2.5 Gaussian Naive Bayes (GaussianNB).....	109
4.5.3.4 Training process for GaussianNB.....	109
4.5.3.4.1 Training process for GaussianNB in controlled environment.....	109
4.5.3.4.2 Training process for GaussianNB in uncontrolled environment	111
4.5.3.4.3 Training process for GaussianNB in combined environment	112
4.2.6 DTC.....	113
4.5.3.5 Training process for DTC.....	114
4.5.3.5.1 Training process for DTC in controlled environment	114
4.5.3.5.2 Training process for DTC in uncontrolled environment	115

4.5.3.5.3 Training process for DTC in combined environment	116
4.2.7 LogisticRegression	118
4.5.3.6 Training process for LogisticRegression	118
4.5.3.6.1 Training process for LogisticRegression in controlled environment.....	119
4.5.3.6.2 Training process for LogisticRegression in uncontrolled environment.....	120
4.5.3.6.3 Training process for LogisticRegression in combined environment	121
4.2.8 Deep Neural Networks.....	122
4.2.9 Convolutional Neural Networks (CNN)	123
4.5.3.7 Training process for Custom CNN	123
4.5.3.7.1 Training process for CNN in controlled environment	126
4.5.3.7.2 Training process for CNN in uncontrolled environment.....	129
4.5.3.7.3 Training process for CNN in combined environment.....	132
4.5.3.8 Other changes tried with SVM.....	134
4.5.3.8.1 Changes tried with SVM in controlled environment.....	134
4.5.3.8.2 Changes tried with SVM in uncontrolled environment	135
4.5.3.8.3 Changes tried with SVM in combined environment.....	135
4.5.3.9 Other changes tried with Custom CNN.....	136
4.5.3.9.1 Changes tried with Custom CNN in controlled environment	136
4.5.3.9.2 Changes tried with Custom CNN in uncontrolled environment	138
4.5.3.9.3 Changes tried with Custom CNN in combined environment	141
4.6 Visualization of Mung Leaf Network Feature Map	144
4.7 Scope of Experimental work for Mung Leaf disease detection	146
4.8 Performance evaluation measurement	147
4.8.1 Accuracy	148
4.8.2 Precision	148
4.8.3 Recall	148
4.8.4 F1-score	149
4.9 CHAPTER SUMMARY	149
Reference:.....	150
Chapter 5	
Results and Conclusion	151
5.1 Overall Performance of Accuracy Classifier wise.....	151
5.2 Dataset Environment wise Comparison.....	154
5.2.1 Controlled Environment.....	154
5.2.2 Uncontrolled Environment.....	155

5.2.3	Combined Environment.....	156
5.3	Disease wise Comparison of machine learning algorithms	158
5.3.1	Cercospora Leaf Spot Disease.....	158
5.3.2	Healthy Leaf.....	159
5.3.3	Powdery Mildew disease.....	160
5.3.4	Yellow Mosaic Virus disease.....	161
5.4	Machine learning (ML) algorithm Vs. Deep Learning (DL) Algorithm	162
5.5	Comparison with previously done work.....	163
5.6	Conclusion	165
	References.....	167
	Bibliography.....	169
	Appendix A	171
	Plagiarism Report	171
	Appendix B.....	172
	Publications	172
	Summary.....	222

List of Figures

Figure 1.1: Image Processing in Agriculture	1
Figure 1.2: Crop Classification	2
Figure 1.3: Plant Organ Selection	3
Figure 1.4: A brief methodology for identification of symptoms using image analysis techniques.....	7
Figure 1.5: Leaf disease classification steps	8
Figure 1.6: Leaf with yellow mosaic virus in (a) controlled and (b) uncontrolled environment	14
Figure 1.7: Leaf with Cercospora Leaf Spot in (a) controlled and (b) uncontrolled environment	15
Figure 1.8: Leaf with Powdery Mildew in (a) controlled and (b) uncontrolled environment.....	16
Figure 1.9: Healthy Leaf in controlled and uncontrolled environment.....	17
Figure 1.10: Study Site of Mung bean Plants	18
Figure 1.11: Sample images of mung bean leaf (Controlled Environment and Uncontrolled Environment)	20
Figure 3.1: Classification of Crop.....	50
Figure 3.2: Plant Organs	51
Figure 3.3: Plant Foliar Diseases Identification Model - (PFDIM)	52
Figure 3.4: Images of the healthy and diseased leaves in (a) controlled and (b) uncontrolled environment	55
Figure 3.5: Leaf Diseases Recognition System Engine	56
Figure 3.6: Stages involved in Pre-Processing.....	57
Figure 3.7: Branching Pattern for analysis of images	60
Figure 4.1: Schematic Diagram of Mung Leaf Disease Detection System	62
Figure 4. 2: Sample Mung leaf (a) Cercospora Leaf Spot (b) Healthy (c) Powdery Mildew (d) Yellow Mosaic Virus	64
Figure 4. 3: Leaf Disease Detection Interface	66
Figure 4.4: Select an image of mung leaf to test.....	67
Figure 4. 5: Open dialog box to browse mung leaf image.....	68
Figure 4. 6: Displaying selected leaf image in interface.....	68
Figure 4.7: Final Result.....	69
Figure 4.8: (a) Original image, (b) Resized image in controlled environment.....	70
Figure 4.9: (a) Original image, (b) Resized image in uncontrolled environment.....	71

Figure 4.10: Original image and resized image from each category in controlled and uncontrolled environment	73
Figure 4.11: (a) Original Image, (b) Augmented Images in controlled environment	75

List of Acronym

AdaBoost	Adaptive Boosting
ANN	Artificial Neural Network
CLS	Cercospora Leaf Spot
CNN	Convolutional Neural Network
DTC	Decision Tree Classifier
GaussianNB	Gaussian Naive Bayes
HOG	Histogram of Oriented Gradients
KNN	K-Nearest Neighbor
LDRSE	Leaf Disease Recognition System Engine
MYMV	Mungbean Yellow Mosaic Virus
PFDIM	Plant Foliar Disease Identification Model
ReLU	Rectified Linear Unit
ROI	Region Of Interest
SVM	Support Vector Machine
HSV	Hue Saturation Value
