	Contents	VII
	Abstract	XII
Chapter : 1	Synthesis and Characterization of Oxadiazole Derivatives Bearing Imidazo[1,2-a]pyridine Scaffold	1
	1.Study on Oxadiazole	1
	1.1 Introduction:	1
	1.2 Common Procedures for Oxadiazole Synthesis:	3
	1.3 Study on Imidazo[1,2-a]pyridine:	13
	1.4 Introduction:	13
	1.5 Common Producers for Imidazo[1,2-a]pyridine:	14

1.6 Result and Discussion:	28
1.7 Reaction Scheme:	30
1.8 Physical Characteristics:	30
1.9 Conclusion:	31
1.10 Experimental Section:	32
1.10.1 Materials and Methods:	32
1.10.2 General Procedures:	33
1.10.3 Spectral Characterization:	34
1.10.4 Representative Spectra:	37
Chapter : 2 Synthesis and characterization of 2-((4-amino-5-(2-methylimidazo[1,2-a]pyridin-3-yl)-4H-1,2,4-triazol-3-yl)thio)-N-phenylacetamide derivatives	48
2. Study on 1,2,4 triazole:	48
2.1 Introduction:	48
2.2 Common Procedures for 1,2,4 triazoles:	50
2.3 Result and Discussion:	75
2.4 Reaction Scheme:	77
2.5 Physical Characteristics:	77
2.6 Conclusion:	78

2.7 Experimental Section:	79
2.7.1 Materials and Methods:	79
2.7.2 General Procedures:	80
2.7.3 Spectral Characterization:	81
2.7.4 Representative Spectra:	85
Chapter : 3 Synthesis and Characterization of 1,2,3-triazol Containing Theophylline Moiety	100
3. Click Synthesis of disubstituted 1,2,3-triazoles:	100
3.1 Introduction:	100
3.2 Common Procedures for 1,2,3-triazole:	104
3.3 Study on Theophylline	112
3.4 Introduction:	112
3.5 Common Procedures of Theophylline:	115
3.6 Result and Discussion:	126
3.7 Reaction Scheme:	127
3.8 Physical Characteristics:	128
3.9 Conclusion:	129
3.10 Experimental Section:	130
3.10.1 Materials and Methods	130

3.10.2 General Procedures:	130
3.10.3 Spectral Characterization:	132
Chapter : 4 Synthesis and Characterization of Schiff bases derived from 2-Chloroquinoline-3-Carbaldehyde and Its Derivatives	148
4. Study on schiff base:	148
4.1 Introduction:	148
4.2 General Mechanism of Schiff base:	148
4.3 Schiff bases derived from 2-chloroquinoline-3-Carbaldehyde:	149
4.4 Common Procedure for 2-chloroquinoline-3-Carbaldehydes Schiff base:	151
4.5 Study on 4-hydrazineyl-5,6,7,8-tetrahydrobenzo[4,5]thieno[2,3-d]pyrimidine:	167
4.6 Introduction:	167
4.7 Result and Discussion:	168
4.8 Reaction Scheme:	170
4.9 Physical Characterization:	170
4.10 Conclusion:	171
4.11 Experimental Section:	172
4.11.1 Material and Methods:	172

4.11.2 General Procedures:	172
4.11.3 Spectral Characterization:	175
4.11.4 Representative Spectra:	178
Chapter : 5 Synthesis and Characterization of 3-(4-Chlorophenyl)-N-hydroxy-N,1-diphenyl-1H-pyrazole-4-carboximidamide Derivatives	190
5. Study on Pyrazole:	190
5.1 Introduction:	190
5.1 Common Procedures for pyrazole synthesis:	193
5.2 Result and Discussion:	213
5.3 Reaction Scheme:	214
5.4 Physical Characteristics:	215
5.5 Conclusion:	216
5.6 Experimental Section:	217
5.6.1 Materials and Methods:	217
5.6.2 General Procedures:	217
5.6.3 Spectral Characterization:	219
5.6.4 Representative Spectra:	223
Chapter : 6 Assessment of the Biological Activity of Newly Synthesized Compounds	237

6.1 Introduction:	237
6.1.1 Current Investigation - Antimicrobial Assessment:	238
6.2 Study on the Biological Activity of Newly Synthesized Compounds.	238
6.2.1 Assessment Methods:	238
6.2.2 Materials and Methods:	239
6.3 Reading Result:	241
6.4 Application:	255
6.5 Conclusion:	256
6.6 Acknowledgement:	257
Bibliography	258

Appendix A Plagiarism Report

Appendix B Publication
