

Table of Contents

Title	Content	Pg. No.
	List of abbreviations used	XI
	Abstract	XIII
Chapter: 1	Synthesis, <i>in Vitro</i> Antiproliferative Activity and <i>In Silico</i> Studies of Indole-Piperidine Hybrids Bearing Amide and Urea Linkages	01
	1.1 Introduction	01
	1.1.1 Synthetic methodologies for the substituted quinoline framework and its biological significance	02
	1.2 Result and discussion 1.2.1 Chemistry	05
	1.3 Anticancer Activity	10
	1.4 Structure Activity Relationship (SAR)	14
	1.5 Molecular Docking	14
	1.6 ADMET evaluation	17
	1.7 Conclusion	19
	1.8 Experimental section 1.8.1 Material and methods for characterization of the compound	19
	1.8.2 Chemistry	20
	1.8.3 Protocol of Anti Cancer Activity	38
	1.8.4 Protocol of Molecular Docking Study	38
	1.8.5 Protocol of the ADMET Study	39
	1.9 Representative Spectral Data	40
Chapter: 2	Synthesis, Antimicrobial Activity and <i>in Silico</i> Studies of Benzoxazole-Piperazine Hybrids Amide Linkages	86
	2.1 Introduction	86
	2.1.1 Synthetic methodologies for the substituted benzoxazole and piperazine framework and its biological significance	88
	2.2 Result and Discussion 2.2.1 Chemistry	91

	2.3 Antimicrobial Activity	93
	2.4 Structure Activity Relationship (SAR)	95
	2.5 Molecular Docking	95
	2.6 Molecular Dynamics Simulation Analysis	99
	2.7 ADMET evaluation	102
	2.8 Experimental section	103
	2.8.1 Chemistry	
	2.8.2 Protocol of Antimicrobial Activity	113
	2.8.3 Protocol of Molecular Docking Study	113
	2.8.4 Protocol of Molecular Dynamic Simulation	114
	2.8.5 Protocol of ADMET Study	114
	2.9 Conclusion	114
	2.10 Representative Spectral Data	115
Chapter: 3	Synthesis, anti-microbial evaluation and docking studies of novel imidazole-naphthalene hybrids	136
	3.1 Introduction	136
	3.1.1 Synthetic methodologies for the substituted imidazole and naphthalene framework and their biological significance	137
	3.2 Results and Discussion	140
	3.2.1 Chemistry	
	3.3 Antimicrobial activity	143
	3.4 Structure-Activity Relationship (SAR)	144
	3.5 Molecular Docking	144
	3.6 Molecular Dynamics Simulation Analysis	147
	3.7 Experimental section	150
	3.7.1 Chemistry	
	3.7.2 Protocol of Antimicrobial Activity	163
	3.7.3 Protocol of Molecular Docking study	164
	3.7.4 Representative Spectral Data	164
	3.8 Conclusion	165
	3.9 Representative Spectral Data	165

Chapter: 4	Targeted Synthesis, <i>In Vitro</i> Antimicrobial Profiling and <i>In Silico</i> Studies of Furan and Pyrrole-Linked Indoline Hybrids Incorporating Amide and Sulfonamide Linkages	183
	4.1. Introduction	183
	4.1.1 Synthetic methodologies for the substituted indoline containing framework and their biological significance	185
	4.2. Results and Discussion	187
	4.2.1 Chemistry	
	4.3 Antimicrobial activity	191
	4.4 Structure-Activity Relationship (SAR)	193
	4.5 Molecular Docking	194
	4.6 Molecular Dynamics Simulation analysis	198
	4.7 ADMET evaluation	201
	4.8 Experimental Section	205
	4.8.1 Chemistry	
	4.8.2 Protocol of Antimicrobial Activity	224
	4.8.3 Protocol of Molecular Docking Study	224
	4.8.4 Protocol of Molecular Dynamic Simulation	225
	4.8.5 Protocol of ADMET study	225
	4.9 Conclusion	225
	4.10 Representative Spectral Data	226
	Summary	266
	Bibliography	267
Appendix A	Plagiarism Report	294
Appendix B	List of Publications	295
Appendix C	List of Seminar/Conferences	301
